# Summary

- Data has inherent value; **Data as a Service** (decoupled from applications), is a new way to connect the growing world of business applications
- Data can **unify customer and audience intelligence**
- Data delivers a **consistent experience** across channel
- **ID graph** is the key to a winning DaaS strategy

# What is a DMP?: **Data Ingest**

## **Deployment Ease**

- Get started fast
- Maintain control
- Operational workflow

## **Flexible Audience Creation**

- Capture variables such as SKUs, price points, model #s
- 3<sup>rd</sup>-party Marketplace

## **On the Fly Onboard**

- Ingest data <24 hrs

## **In a nutshell**

Ask about onboarding data from multiple sources, linking to hashed personally identifiable information (PII)/email, and true on the fly data onboarding and transfer.

# Full Service Taxonomy Creation

## A taxonomy is a structure for organizing information:

- Users are classified into segment categories
- Segment categories are organized in a hierarchical structure
- Ability to create flexible categories based on historical data

# What is a DMP?: **Add Meaning**

## **Classification**

- Prescriptive
- Categorical
- Historical
- Keyword

## **Audience Analytics**

- Media data
- Insights reporting
- Attribution

## **Look-Alike Modeling**

- Owned technology
- Best-of-breed partners

### **In a nutshell**

Ask about breadth and depth of data for analytics and modeling

# Audience for Verification & Expanded Reach

<input type="checkbox"/>	62744 Superduty (Interest -> Autos -> Makes & Models -> Ford -> F-Series)	4,800	48,800	\$1.19	46
<input type="checkbox"/>	160172 Game Cube (Interest -> Video Games -> Systems -> Vintage/Retro)	61,600	621,400	\$1.19	45

## Audience Discovery

Expand your core audience

# What is a DMP?: **Data Activation**

## Open Platform

- Open-Web
- Closed-Web
- 3<sup>rd</sup>-party bandwidth

## Data Unchained

- Cross-channel
- Cross-device

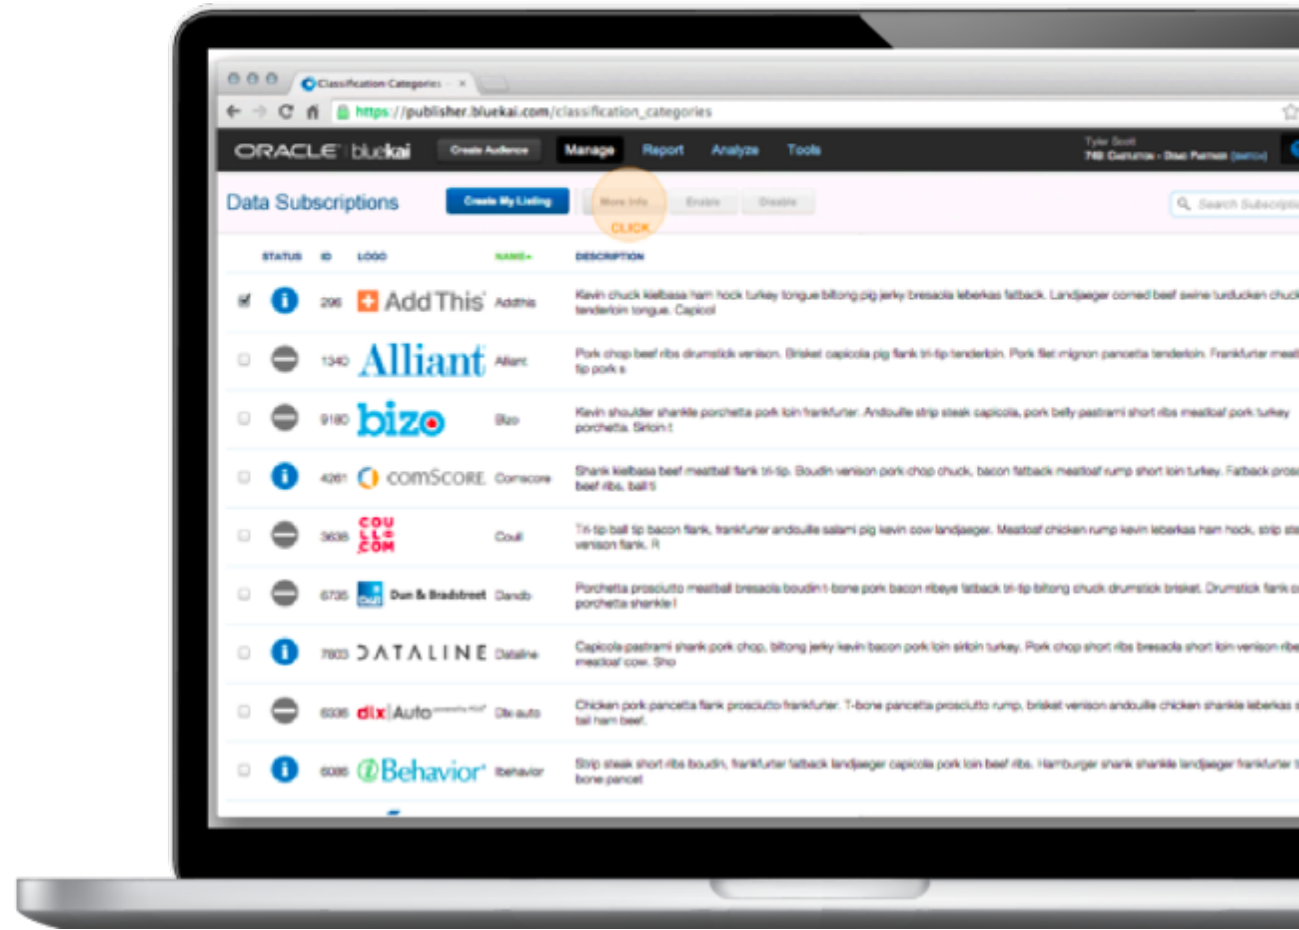

## In a nutshell

Ask about the true scale of activation—not only multiple partners and channels but also deep integrations with strong overlap and coverage

# Sharing data: 2<sup>nd</sup> party listings

## “Classifieds” of Second Party Data

- Exposure tool that facilitates discovery of 2nd party relationships between Marketers, Publishers, and Data Providers
- Centralized location for viewing 2nd party assets and establishing direct relationships

# What a DMP Is **NOT**

- ✗ **Demand-side platform (DSP):**  
DMPs can be media agnostic
- ✗ **A tag manager:** DMPs can also ingest server-to-server data
- ✗ **An analytics and data warehouse:**  
DMPs activate data
- ✗ **A closed ecosystem:** DMPs free your data
- ✗ **Just for cookies:** DMPs manage identity and data across channels
- ✗ **Just infrastructure:** DMPs are central to your marketing team
- ✗ **Just software:** DMPs should provide marketing intelligence

# Why Do I Need a DMP?

## Manage

multiple online campaigns across different ad networks, exchanges, and publishers

## Control

over data assets, maximize segmentation, prevent leakage, and monitor partner usage

## Enhance

niche-targeting, messaging capabilities, and scalability

## Improve

response rates, conversion, and brand recognition

## Efficiency

advertising costs and improve overall ROI

# Re-engage Users to Drive More Retention Revenue
